📁 WORK EXPERIENCE

03/2026 – Present
Hybrid, Hyderabad

Insight Global @ CCC

Lead Data Engineer

- Led multiple enterprise-scale Data & AI initiatives involving canonical data modeling, AI-ready pipelines, and cloud-native analytics architectures across healthcare billing systems.
- Working on Healthcare Billing data, building data modelling system from scratch uses niche technologies and provided end to end traceability with billing reconciliation and certification features.
- Handling multiple data projects related to Data & AI.
- Responsible for Onboarding Data Engineers across organization, conducted tons of interviews on and off campus

04/2024 – 02/2026
Hyderabad, India

Insight Global @ T-Mobile

Senior Data Engineer

- Handled massive volumes of cellular and broadband service data using Snowflake, managing end-to-end pipelines from data layering → orchestration → analytics also while leveraging Azure services.
- Designed monitoring and reporting solutions with Azure Log Analytics, transforming raw logs into actionable insights and enabling proactive decision-making.
- Created object-usage optimization utilities for SQL and storage layers, automating cleanup of unused objects and cutting operational time by 50%.
- Built interactive, high-value multimodal Agentic tool on recommendation systems utilizing more than one LLM
- Developed robust MCP (Model Context Protocol) servers using Google Tox Box, enabling seamless LLM communication to interact with various external database servers. Also, Integrated LangChain and LanSmith services to design advanced workflow orchestration and project tracing systems, improving process transparency and end-to-end task automation.

08/2023 – 03/2024
Hyderabad

MAQ Software @ Microsoft

Software Engineer 2

- Designed and implemented a modern BI architecture + Dataverse that utilized advanced technologies, resulting in a 30% increase in data processing efficiency for business stakeholders.
- Managed large tabular datasets of up to 200 million rows, optimizing reporting performance and reducing update time by 40% through automation of daily processes.
- Conducted extensive examinations of clients' business domains, delivering over 50 ad-hoc data manipulation tasks monthly, that enhanced insights into future data trends.
- Built various visualization pages that were utilized by Fortune 500 companies, leading to a whopping improvement in decision-making speed.

09/2021 – 07/2023
Hyderabad

MAQ Software

Software Engineer 1

- Implemented business analytics models for Microsoft clients using Power BI, resulting in a 30% increase in efficiency.

- Designed and implemented Power Automate flows to extract data from diverse sources, achieving a 25% reduction in data processing time.
- Integrated data from different sources to build ETL, ELT, and data integration pipelines, improving data accessibility by 40%.

 SKILLS

Cloud and Data Infrastructure Skills

Gen-AI, Machine Learning, XG-Boost, Random Forest, Deep Learning, LLM-Integration, Agentic systems, ChatBots, Docker, Vector Databases, Azure Services, Power BI, Power Automate, Dataverse, Data Lake, Databricks, Data Factory, Cloud-native data architecture, Data security, Compliance, Data governance, Distributed data processing orchestration, Snowflake, Microsoft Azure, Power BI, Microsoft Dataverse, RDBC

Technical and Programming Skills

BigQuery, Azure, GCP, Apache Spark, Scala, Python, Apache Airflow, Cloud Composer, SQL, ETL, ELT, Data Pipelines, Data Engineering, Data Streaming, Data Warehousing, Google Cloud Storage (GCS), Database Fundamentals, ACID, Snowflake Schema, Database Normalization, Database Denormalization, Serialization Formats, OLTP, OLAP, Relational Databases, Key-Value Databases, Document Databases, Spark Performance Optimization, Spark Debugging, Code Review, Troubleshooting, Agile Methodologies, Production Support, CI/CD, Computer Science Fundamentals, Requirements Gathering, Cross-functional Collaboration

Analytical & Collaboration Skills

Cross-functional collaboration, Analytical Thinking, Problem-solving, Stakeholder management, Agile methodologies, DevOps, CI/CD, Software Development Life Cycle (SDLC), Project Isolation & Deployment

 CERTIFICATIONS

DataBricks Associate Data Engineer - Certification

- Credential ID: 130445583
- Issuer: Microsoft
- Date: 2024-09

DP-600: Microsoft Fabric Data Analytics Engineer Associate

Issuer: Microsoft

 EDUCATION

BTech - Computer Science

Chandigarh University

04/2018 – 04/2022

- GPA: 7.5 CGPA
- Computer Science graduate with specialized expertise in data science, skilled in applying machine learning, statistical analysis, and data visualization techniques to solve complex business problems and drive data-driven decision making.

 AWARDS

Quarter Champion & Person of the Month Nomination

Insight Global

01/11/2025

Consistently recognized by Fortune 500 clients

Microsoft

01/03/2024

Got Client appreciation multiple times on successfully delivering complex tasks with efficiency and precision

Recognised by T-Mobile client

T-Mobile

Working in multiple teams.
